EXPERIENCE

Contract Agent — *Full-Stack Web Developer*

Nov 2023 - Present

- Created, managed, and assisted in web app creation in all aspects from the birth of an idea to the support of a long standing company
- Enhanced SEO and increased SERPs rankings
- Taught, referred, and on-boarded other developers breaking into tech to provide opportunities in learning web development

100Devs — *Software Engineer*

Apr 2023 - Present

- Created responsive websites to fit and fill the niches of clients
- Collaborated with a community to help develop and manage large scale projects using CMS and repositories
- Built and maintained full-stack web applications

Odin, Codecademy, MDN — *Intern*

Sept 2019 - Apr 2023

- A rotation of paid for and getting paid opportunities focused on modern techniques and skills for web development
- Contributed to open source projects like Chromium and WebKit

RECENT ENDEAVORS (2025)

KardChips — *Full-Stack Web App*

Allows users to purchase exchangeable casino chips that may be used in participating and third party areas of gambling without the need of interacting with a physical chip broker using a digital wallet. Implements 2-factor authentication and both hashing and salting for security.

SilkenStrands — *Full-Stack Web App*

A beauty product and salon allowing users to login, make reservations, choose a stylist, and order online. Owner/operators can mark customers as complete, input and remove photos, text, and more due to responsive architecture, and manage form submissions.
